## PRAIRIE'S LINE ASSESSMENT MADE

Equalization Board Fixes Valuation at Five and a Half Million.

## HOLD WARM SESSION

Texas Company's Valuation Is Materially Reduced Over Last Year.

Special to The World.

OKLAHOMA CITY, Aug. 7.—After a sharp contest, the state board of equalization today fixed the taxable valuation of the Prairie Pipe Line company in Oklahoma at \$5,500,000. A few minutes later, overruling the vigorous opposition of Governor R. L. Williams, who had been for the higher figure, members of the body who had fought the \$10,000,000 valuation succeeded in putting through a vote of reconsideration and fixing the valuation finally fixed at \$5,500,000.

Fixing the value of the Prairie developed one of the hottest sessions the board has had. No less than six hours were taken, and the vote was four to three one way or the other each time. Governor Williams, President of the board of agriculture and Examiner and Inspector Fred Parkinson were the ones standing pat for a valuation of \$10,000,000 or more at first. Treasurer W. Alexander, who favored a lower figure, finally voted with them in order to effect an agreement. It was Alexander who later made the motion to reconsider.

Governor Williams and Secretary Lyon exchanged warm words during the discussion preceding an agreement on the Prairie.

"I think we ought to show this company the same consideration we do other oil companies," he said.

## Figures Show Valuation.

"We're not penalizing it," broke in the chief executive, rising from his chair and speaking with emphasis. "According to this corporation's own figures its property in Oklahoma represents an investment of \$10,000,000 and Mr. Fitzgerald admits that its stock is worth more than that. Remember you are here to assess these companies at their true cash value. How can you go to the other extreme?"

## RAISE IN MARKET FEATURE OF WEEK

Price of Crude Oil in Oklahoma Again Is on the Up Grade.

## BLACKWELL IS BEST

Most Important Recent Development Was the Big Spencer Well.

The past week has been a triumph for the oil industry in Oklahoma. It witnessed a rise in the price of crude oil of 15 cents, a 10-cent rise in the price of gasoline, and a 10-cent rise in the price of kerosene. The price of oil in Oklahoma is now on the up grade.

The most important recent development was the Big Spencer Well. This well, located in the Blackwell field, is the best yet discovered in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## Hard to Buy Oil.

It is almost impossible to buy any large quantity of oil. The price of oil is now on the up grade. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## Will Test Padon District.

The failure of the Padon district in the Blackwell field is a disappointment. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## One Sale Pending.

No sale of any importance has been reported. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## At Bald Hill.

The Bald Hill field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## At Kellyville.

The Kellyville field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## Northwest of Sapulpa.

The Northwest of Sapulpa field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## At Healdton.

The Healdton field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## At Bald Hill.

The Bald Hill field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## At Kellyville.

The Kellyville field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## PADEN DISTRICT TO BE TESTED OUT

Special to The World.

PRAGUE, Aug. 7.—With the recent advance of 15 cents for crude oil, the information has been received that four new wells are to be drilled in the Padon district. The wells are to be drilled in the Padon district, which is one of the largest oil fields in Oklahoma.

The wells are to be drilled in the Padon district, which is one of the largest oil fields in Oklahoma. The wells are to be drilled in the Padon district, which is one of the largest oil fields in Oklahoma.

## North of Cushing.

The North of Cushing field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## White & Shaler are down about 1,250 feet in the Padon May Barrels.

The White & Shaler field is one of the largest oil fields in Oklahoma. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## Metropolitan Oil Company is casing out the Padon May Barrels.

The Metropolitan Oil Company is casing out the Padon May Barrels. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## July Oil Report

Oil City, Oklahoma.

A marked increase in the number of wells being drilled in Oklahoma is being reported. It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.

## Summary of Completed Work.

The summary of completed work in Oklahoma is as follows: It is estimated to contain 100,000,000 barrels of oil.

The well was discovered by the Blackwell Oil Company. It is located in the Blackwell field, which is one of the largest oil fields in Oklahoma. The well is estimated to contain 100,000,000 barrels of oil.
